

SUMMARY

Aspiring Computer Science Engineer specializing in Cyber Security and Digital Forensics. Experienced in full-stack development and AI integration, with a strong foundation in data structures and scalable system design. Passionate about solving complex problems through innovative technology.

EDUCATION

- **Vellore Institute of Technology, Bhopal** Bhopal, Madhya Pradesh
B.Tech in CSE (Spec. in Cyber Security and Digital Forensics); CGPA: 9.05 2023 – 2027
- **Army Public School, Bhopal** Bhopal, Madhya Pradesh
CBSE Senior Secondary Certificate; Score: 87.60% 2022 – 2023
- **Army Public School Binnaguri** Binnaguri, West Bengal
CBSE Secondary School Certificate; Score: 94.80% 2020 – 2021

PROJECTS

- **Campus CCRM System:** Proactive Full-Stack Developer building a centralized grievance management platform using **Node.js and MongoDB**. Improved resolution transparency through real-time status tracking and automated notifications. Engineered secure authentication and database management to streamline workflows for students and faculty. (Oct 2025 – Present)
- **Kisan Sarathi App:** Developing a mobile application for crop management using a custom **LLM** for disease identification via image analysis. Integrated **IoT sensors** for live environmental data streaming. Built with **Android, Firebase, and REST APIs** to provide real-time irrigation and soil advice. (July 2025 – Present)

CERTIFICATIONS

- The Bits and Bytes of Computer Networking by Google, Coursera
- Applied Machine Learning in Python by University of Michigan, Coursera
- Blockchain and It's Applications by IIT-KGP, NPTEL

SKILLS

- **Technical:** Node.js, JavaScript, Python, C++, Java, Machine Learning
- **Core Subjects:** Database Management Systems, Operating Systems, Object Oriented Programming, Data Structures and Algorithms, Computer Networks
- **Soft Skills:** Communication, Adaptability, Leadership, Public Relations
