Summary

Cybersecurity-focused Computer Science undergraduate with proficiency in full-stack development, machine learning, and scalable system design. Proven track record of engineering secure Node.js web applications, custom LLM-powered mobile platforms, and ML-based projects. Skilled in C++, Python, JavaScript, and database management, with a sharp focus on software security and data-driven solutions.

Education

Vellore Institute of Technology , Bhopal <i>B.Tech in CSE (Spec. in Cyber Security and Digital Forensics)</i> CGPA: 9.09	Bhopal, Madhya Pradesh 2023 – 2027
Army Public School , Bhopal <i>CBSE Senior Secondary Certificate</i> Score: 87.60%	Bhopal, Madhya Pradesh 2022 – 2023
Army Public School , Binnaguri <i>CBSE Secondary School Certificate</i> Score: 94.80%	Binnaguri, West Bengal 2020 – 2021

Projects

- **Campus CCRM System** October 2025 – January 2026
Proactive Full-Stack Developer building a centralized grievance management platform using Node.js and MongoDB. Improved resolution transparency through real-time status tracking and automated notifications. Engineered secure authentication and database management to streamline workflows for students and faculty.
- **Kisan Sarathi App** October 2025 – May 2026
Developing a mobile application for crop management using a custom LLM for disease identification via image analysis. Built with Android, Firebase, and REST APIs to provide real-time irrigation and soil advice. Was made available in various Indian Languages to ensure Ease of Access and Inclusivity for On-Ground implementation and use.
- **Phishing Website Detection** April 2025 – June 2025
Engineered an end-to-end phishing website detection web interface leveraging the CICIDS dataset. Developed a custom pipeline to extract 31 network and URL features, implementing Logistic and Linear Regression models to accurately classify malicious traffic and display threat probability metrics in real time.

Certifications

- **The Bits and Bytes of Computer Networking** – Google, Coursera
- **Applied Machine Learning in Python** – University of Michigan, Coursera
- **Blockchain and Its Applications** – IIT-KGP, NPTEL

Skills

- **Technical Skills:** Node.js, JavaScript, Python, C++, Java, Machine Learning, SQL, Data Science, Data Analytics
- **Relevant Coursework:** Database Management Systems, Operating Systems, Object Oriented Programming, Data Structures and Algorithms, Computer Networks, Foundations of Data Science, Advanced Data Analytics, Software Engineering, Software Vulnerability Testing
- **Soft Skills:** Communication, Adaptability, Leadership, Public Relations
